Report sprint 03

Your project name

planet-pals - v3.0.0

Team members of PlanetPals

- Nathalie Claire Huppert - nathalieclaire/planet-pals
- Estella Kinzel - (fork) estellaaaa/planet-pals
- Tobias Bayer - (fork) abductedRhino/planet-pals

The backlog as a text file

```
Product Owner: Nathalie
Scrum Master: Estella

BACKLOG

IN PROGRESS

DONE

- install express.js
- install ejs
- install express-ejs-layout
- install nodemon for development
- rewrite routes
- make up user stories (one of them passing a parameter)
- create branch for each story
- Branch: Story01 "As a user, I want to get an error view (as 404), to
inform me that an error occured (that the page does not exist)"
- Branch: Story02 "As a john doe, I want a personalized greeting on the
home page."
- merge each branch into main/master
- tag the version where the sprint was completed with "Sprint_02"
- add Error Handling to the Application(lessons 10, 11 and 12 of unit 2)
- Branch: Story03 "As a user, I want to be able to click an item on the
homepage and be routed to the product's page."
    (implement one more story making use of templates and partials, dynamic
content)
- write status report (submit as .pdf or .txt to moodle as
"Group_<X>_Project_<Y>_Sprint03.txt.")
- tag the version with "Sprint 03" -> make release
```

The stories you've implemented in this sprint

```
- Branch: Story03 "As a user, I want to be able to click an item on the
homepage and be routed to the product's page."
    (implement one more story making use of templates and partials, dynamic
content)
```

A reflection on any technical issues that you have encountered and how you resolved them (or not)

- We had some issues with an oversight, where we misspelled productID.
- The routing was difficult, because of the first issue.
- Discord did not work for us this week, we had multiple issues with our communication.
